WORK EXPERIENCE

25/07/2021 – 07/2023 Iasi, Romania

FULL STACK DEVELOPER AMPLIFIED SOFTWARE

A wonderful environment at Amplified.

Had a great time working with them, learned a lot of things, and sharpen my coding and developer skills.

I've worked on a number of projects here:

- **Kaleido.** An art application for displaying artworks and VR interaction with artworks.

Worked on creating endpoints and logic for the displaying of artworks and various onboarding processes of the application. Also worked on email templating and email sending logic, having experience working with AWS tools like Sendgrid, establishing groundwork for automated email templating and localization.

- **Office-together**, acquired by Envoy later on. An office managing app, it allowed the managing of office seats and schedules for the employee, documents, and various events that the office may have.

Implemented and improved UI/UX in the application. Expanding existing user experience, allowing both mobile and desktop apps to be displayed properly on the devices.

- **Shiftsmart** is a freelancing app for managing company employees and employee work.

A big part that I've worked on here was in refactoring old code and logic in both the desktop application and mobile application.

A minor difficulty here was that of switching from using new React functional components to old React code using class components, in the refactoring process I've learned old coding style and code architecture.

Besides this I also worked on creating payment logics for "bonuses" in the application and mobile development with React Native.

EDUCATION AND TRAINING

2018 – 2021

BACHELOR IN COMPUTER SCIENCE University of Alexandru Ioan Cuza
